

# Tehama Alert!

## Notification Sign Up Form

In the event of an emergency, local officials will use this system to call homes and businesses in the affected area. If you register other contact options such as your mobile phone, work phone, or email, you can be notified even when you're not at home. The system will try all your contact options until you confirm that you got the message. You specify how you want to be contacted. For example, you can tell the system to call your mobile and work phones in case of an Emergency Alert, but only send an email for a non-emergency Community Alert. You specify which locations you care about. For example, you can be notified of issues that affect your house, your mother's house, or your children's school.

Add your contact information to the Citizen Alert system by filling out this form. All information you provide is kept confidential and will not be sold or used for any purpose other than alert notifications. You can opt out or change your notification preferences at any time.
